FELINE SURGERY AND DENTAL CONSENT FORM

PRE-ANESTHETIC BLOOD TESTS

Your cat/kitten is with us for a procedure that will require a sedative and/or anesthesia. We **recommend** a pre-operative blood profile to check for adequate numbers of blood cells and possible problems in the kidneys and liver that may not be evident on a physical examination. Cats that are older than 7 years of age are **REQUIRED** to undergo a more extensive blood evaluation of the red and white blood cells, platelet count, and more rigorous kidney, liver, and electrolyte evaluation.
 NO -- My pet is under 7 years old. I **DECLINE** pre-operative blood testing you recommend, but perform the procedure.

INTRAVENOUS CATHETER AND FLUIDS

In our continued commitment to providing your pet with the best medical care we will place an intravenous catheter and administer intravenous fluids during any procedure requiring general anesthesia for more than 5 minutes. Kidney disease is common in cats, unfortunately, it can be difficult to detect in the early stages. With the IV catheter and fluids we can help protect kidney function and maintain blood pressure, and it also gives us direct access to the veins in the unlikely event of a crisis.

SEVOFLO ANESTHESIA

Currently we use Isoflurane anesthesia, a gas anesthetic with an excellent safety record. You may elect Sevoflo gas anesthesia, which is an anesthetic used for 95% of all human pediatric procedures in the US. Sevoflo's advantage is rapid and smooth induction and recovery with no "anesthesia hangover". There is an additional cost of \$1.00 per minute of anesthesia time above the normal anesthesia charge
 YES I authorize the use of Sevoflo if it is appropriate in my pet's procedure and agree to pay the additional charge as above.

PAIN/COMFORT MEDICATIONS

Pain medications are administered in hospital to all surgical patients, and if appropriate will be provided for at home post-surgical maintenance. If your cat is having declaw surgery and is over 6 pounds of body weight it will have a fentanyl patch placed to provide continual 72 hour pain management, and if your cat is under 6 pounds of weight it will receive different pain management. Cat's having fentanyl patches applied will have a small patch of fur shaved off the side of their chest.

VACCINES

We require that all cats/kittens are current on their Rabies vaccination and Feline Distemper vaccination. There may be an exam charge if vaccines are given. We recommend an annual Feline Leukemia Virus booster for outdoor cats, after initial testing is done.
 YES, please administer the following vaccines: DISTEMPER (\$20.00) RABIES (\$18.50) LEUKEMIA VIRUS (\$18.50)
 *Occasionally, a pet can have a reaction to the vaccines. The reaction can be mild, such as a few hours of being lethargic, or in very rare cases, death from anaphylactic shock. It is impossible to predict which pets are prone to vaccine reactions; however, every effort will be made to treat your pet, should a reaction occur. **If you are aware of your pet having had a vaccine reaction in the past, please let the doctor know so that precautions can be taken.**

DENTAL PROCEDURES

Occasionally intraoral radiography, tooth extraction, or repair is necessary due to advanced periodontal disease or severe damage to a tooth as a result of trauma or cavities. An additional fee would be incurred for these procedures. If you would like to be called to discuss any necessary extractions or repairs, please let us know now, and leave us **ONE** phone number where you can be reached. **Pain medications may be administered with extractions.**
 Do you authorize tooth extraction(s) or repair without contacting you first? YES NO* *PHONE # _____
 *If we cannot contact you regarding medically necessary extractions or fillings, then a second procedure will need to be scheduled to perform these procedures.

PERMANENT IDENTIFICATION

We can implant a microchip into your pet for an ID that can't get lost, this microchip provides identification in the United States as well as internationally! This simple procedure can be performed while your cat is here today.
 Does your Pet have a microchip? Yes ___ No ___ Would you like a microchip implanted today? Yes ___ No ___

RECOMMENDED TESTS

FECAL TEST
 YES -- Please provide a fecal examination for my pet. *For cats that have not been tested within the past year.* (\$22.30)

FELINE LEUKEMIA VIRUS/FIV VIRUS COMBO TEST
 YES -- Please test for both Feline Leukemia and FIV Virus. *For both indoor and outdoor cats that have never been tested and are over 6 months of age.* (\$58.60)

I hereby certify that I have read and fully understand this authorization for treatment. I am the owner or agent for the above described animal and have the authority to execute this consent. I assume financial responsibility for all charges incurred to the above patient and agree to pay all such charges when the animal is released from the hospital. I understand that in the event of an emergency my pet will have treatment provided at my cost and I will be contacted as soon as possible. I understand that any procedure, especially anesthesia, involves some risks and that results cannot be guaranteed. I understand that if the animal is not current on the combination of distemper and rabies vaccinations, this will be done upon hospitalization and added to the cost of the above procedure(s).
